

Empirical Seminar on Economic Policy

Course Outline

1 General information

Responsible unit: Chair of Economic Policy
Lecturer: Prof. Dr. Kornelius Kraft
Contact: Kornelius Kraft
Vogelpothsweg 87
D-44227 Dortmund
Kornelius.Kraft@tu-dortmund.de
Language: English

2 Description

The empirical seminar is dedicated to the understanding and practical application of empirical methods in the context of economic questions and issues. In particular, students should write an empirical term paper using econometric methods. In order to do so, extensive and representative data sources are made available, however, students also can provide own ideas, topics and data. Furthermore, the participants of the seminar are actively supported during their process of estimation and writing.

3 Eligibility and prerequisites

The seminar is open to master students enrolled in the M.Sc. in “Economics” or “Management and Economics”. RGS students enrolled in the structured doctoral program are also eligible to attend to this seminar as part of an elective field course. The seminar is restricted to a maximum of 20 students. To attend the module, students should have a basic knowledge in econometrics as well as interest and motivation to conduct a research project on their own. Basic knowledge of the statistics program Stata might be helpful.

4 Course grading

The final grade is based on the term paper and a 20 minutes presentation as well as discussion in class. Moreover, active participation during the paper presentations is appreciated.

5 Course material

All course materials will be provided in the corresponding Moodle class.

6 Course schedule

To participate in the seminar, please prepare an outline of your topic, envisaged econometric methods and data you would like to use (about one sheet of paper).

Discussion of Structure:	April, 11 2019
Presentation:	May 23, 2019 (and May 24, 2019 if applicable)
Submission of paper:	June, 21 2019 (12:00 pm)
