

Econometric Evaluation of Economic Policies		
<i>Lecturer:</i>		<i>Responsible for the module:</i>
Bauer / Schmidt		Bauer
<i>ECTS:</i>	<i>Workload:</i>	<i>Frequency:</i>
5	150	Every semester
<i>Medium of instruction:</i>	<i>Max. number of participants:</i>	<i>Registration procedure:</i>
English	30	See webpage

Master Economic Policy Consulting	X	Compulsory module (20 ECTS)
		Spec.: Quantitative Methods
		Spec.: Regional, International and Development Economics
		Spec.: Environmental, Resource and Energy Economics
		Spec.: Microeconomic Theory and Applications

Master Economics		Core-Module (min. 30 ECTS)
		Spec.: International Economics and Finance
	X	Spec.: Economic Policy
	X	Elective in Economics (min. 75 ECTS)
		Elective in Management (max. 15 ECTS)

Master Management and Economics		Elective in Management (min. 40 ECTS)
	X	Elective in Economics (min. 40 ECTS)

Master Management		Spec.: Accounting, Finance, Taxation
		Spec.: Operations and Service Management
		Spec.: Marketing
		Elective in Management (min. 60 ECTS)
	X	Elective in Economics (max. 30 ECTS)

Master Sales Management		Compulsory module (45 ECTS)
		Compulsory elective (min. 15 ECTS)
	X	Elective (max. 20 ECTS)

<i>Type of module</i>	Lecture:	Econometric Evaluation of Economic Policies	3 c.h.
<i>Composition of module grade</i>	100 %	Written exam <u>or</u>	90 Min
	100 %	Presentation	45 Min
<i>Prerequisites</i>	Advanced knowledge of empirical research and/or econometrics is recommended.		

<i>Imparted soft skills</i>	X	Analytical thinking
	X	Independent studying and learning
		Project/time management
	X	Literature research and documentation
	X	Presentation of scientific results
	X	Presentation techniques/language competencies
		Team work and capacity for team work
	X	Critical thinking
<i>Qualification targets</i>	After participation, the students should be able to understand the newest econometric techniques developed for the evaluation of economic policies. They should understand their basic identification strategy, the necessary data to implement these strategies as well as the main problems of these strategies. The module aims to give the students the necessary skills to read and understand the scientific literature in this area and to give a critical assessment of empirical evaluation studies.	
<i>Short description</i>	Tight public budgets increase the need to learn more about the effectiveness and efficiency of public policy measures. The empirical evaluation of these policies, however, is connected with difficult methodological problems. This module discusses the newest developments in the literature on the empirical evaluation of economic policy measures. A lecture introduces the basic concepts. Central contributions to the literature will be presented by the students themselves and discussed by the participants in a detailed way.	
<i>Learning material and relevant literature</i>	List of literature (journal articles) will be provided in the course.	

Economics of Migration		
<i>Lecturer:</i>		<i>Responsible for the module:</i>
Bauer mit Assistenten		Bauer

X	Critical thinking		

<i>Qualification targets</i>	After participation, the students should be able to understand the most important theoretical models in the economics of migration as well as the empirical evidence concerning issues in this area. The module aims to give the students the necessary skills to read and understand the scientific literature in this area and to give a critical assessment of empirical studies and policy measures.
<i>Short description</i>	Whether immigration can solve the problems connected to the demographic change, the problem of the economic and social integration of immigrants or whether the EU-enlargement will lead to dramatic East-West migration flows are very important topics on the political agenda in almost all developed countries and source of heated public debates. This module aims to introduce the participants to the economics of migration. In a basic lecture, the participants are introduced to the basic theoretical and empirical concepts of the three main topics of the economics of migration: (i) the migration decision; (ii) the economic and social integration of migrants; and (iii) the economic effects of migration on natives. The students will then be assigned to present major publications on the economics of migration in order to deepen the knowledge obtained through the lecture.
<i>Learning material and relevant literature</i>	List of literature (journal articles) will be provided in the course.
